Before diving into the specific note-taking answers, it's important to clarify the phrase itself. The "turning of the tide" refers to the period during World War II when the Allied forces began gaining significant momentum against the Axis powers. This shift wasn't due to a single event but a combination of military victories, strategic alliances, and resource mobilization. Study guides on this topic often highlight how this phase marked a transition from defensive to offensive operations for the Allies.

Key Battles That Marked the Turning Point

One of the most common areas covered in study guides is the series of critical battles that helped the Allies gain the upper hand. These battles are central to understanding why the tide turned.

1. **Battle of Stalingrad (1942-1943):** Often cited as the single most decisive battle, the Soviet Union's victory here halted the German advance into Eastern Europe.
2. **Battle of Midway (June 1942):** This naval battle was a significant blow to Japan's Pacific fleet and shifted naval dominance to the Allies.
3. **El Alamein (October-November 1942):** The British victory in North Africa stopped Axis forces' push into the Middle East and protected vital oil supplies.
